

concrete

INDEX

Volume 5

1971

Figures in **bold** represent the issue number, which is followed by the relevant page number

Articles

Admixtures	12:376
Are your tolerances really necessary?	7:235
Behaviour of piles, The	1:18
Bridge deck costs—an unhelpful report	3:89
BRMCA Authorization Scheme progress report	1:30
Brunel and Bristol	9:277
By-pass provides concrete road cost data	1:27
Cement-stabilized bases and sub-bases	6:181
Cement handling plant for Rio-Niteroi Bridge	11:361
Clifton suspension bridge, The	9:279
Compression anchorage of bars	10:329
Concorde, BAC, and Bristol	9:283
Concrete beams and fire	2:63
Concrete bridge slid into position, 6,500 ton	8:259
Concrete for pumping	12:377
Concrete in recent roadworks	2:58
Concrete material supply industries go metric	1:28
Concrete piling at Drax power station	1:13
Concrete press demonstrated at the Building Research Station, 5,000 tonne	7:237
Concrete reinforced with fibrous wire	3:73
Concrete Society 1971 Award, The	6:185
Concrete Society Fourth Annual Convention, The	9:275
Concrete Society visit to Greece, The	1:21
Concrete Society visit to Munich, The	7:219
Concrete structures in a natural environment	10:323
Concrete structures on the new roadworks at Basildon New Town	7:223
Contrasting structures for two technical colleges	3:93
Construction of the new London Bridge	4:123
Construction of the M5 Wynhol Viaduct, The	9:318
Cracking in one-way slabs	3:91
Cross of Lorraine, The	8:258
Demolition of a large reinforced concrete building	9:295
Design by the draft unified code	5:155
Design charts for orthotropic bridges	10:330

Design of walls constructed of hollow concrete blocks with concrete infilling, The	8:262
Durability of prestressed concrete structures	6:183
Economics of pumping	12:385
Effect of a polyethylene oxide admixture on the strength of concrete	10:321
Erection of the new Biology Block for Portsmouth Polytechnic	8:249
Explosions in buildings—The behaviour of reinforced concrete frames	4:109
Failure of pipes in the Geehi River aqueduct	1:29
Ferrocement: a survey	2:48
Fibre-reinforced cement-based materials	3:97
Fire training ship constructed in reinforced concrete	12:390
First half of Reading's Inner Distribution Road complete	5:167
First use of new MOT/C&CA standard bridge beams	2:65
FIP in between Congresses	4:128
FIP Progress report	10:334
Forum on pumped concrete	12:387
Forums and Discussion (The Concrete Society Fourth Annual Convention)	9:320
From discrete materials—a concrete product	8:243
Go-Con process for large pressed panels, The. Part 1: Requirements and technology	5:149
Guniting repairs to fire-damaged concrete structures	4:118
High concrete strength within the hour	8:253
International Building Exhibition Conferences	6:180
Identification of reinforcing steel	6:180
Lightweight concrete speeds construction on Wandsworth project	11:351
Long cylinder stroke concrete pump	12:389
Membership of the Council and principal committees of The Concrete Society 1971-72	9:303
Multi-storey car parks—a modern answer to a modern problem	11:355
New cathedral church of St Peter and St Paul, Bristol, The	9:287
New development and testing facility for prestressing systems	4:127
New projects in Hong Kong	3:92

Non-destructive testing of concrete and its relationship to specifications	5:137, 8:266
North west members visit to massive Seaforth Dock project	9:297
Other recent civil engineering works in the Bristol area	9:292
Partial prestressing and its suitability for limit state design	5:169
Past and future achievements in reinforced concrete	2:41
Performance in concrete of admixtures with accelerating, retarding or water-reducing properties, The	6:175
Philosophy of testing, The	5:148
Professional opinions on crack widths	11:348
Profit from testing—philosophy of testing	11:363
Progress report of The Concrete Society Working Party on Fire resistance	4:112
Purchasing precast concrete	1:31
Rapid construction using sliding forms	10:327
Rapid extension of reinforced and prestressed concrete piles	1:9
Recent concrete paving in the UK: The Raglan-Usk section of the new Midlands road	9:314
Reducing fire losses by constructing in concrete	4:105
Reinstatement of concrete construction after a fire, The	4:115
Research at Wexham Springs	8:248
Research Seminars	1:32
RIBA Architecture Awards 1971	9:273
Role of concrete in the Abu Simbel project, The	11:343
Shrinkage and creep in concrete bridges	6:179
Site precasting for the Lynemouth smelter	4:125
Small-bore mobile concrete pumps	12:370
South African Industrialized Building Congress, The	3:83
Specification and use of ready-mixed concrete for cast-in-place piling, The	6:211
S.S. 'Great Britain', The	9:281
Steel formwork	7:228
Stress tests on a Basildon viaduct beam	7:227
Structural assessment of lightweight aggregate concrete	7:229
Structural damage by gaseous explosion surveyed	10:328
Structural use of lightweight concrete	9:299
Supply of ready-mixed concrete	12:381
Tailor-made concretes—scope for immediate development	3:77
Test methods to assess the performance of admixtures in concrete	5:142
Theatre Royal, Bristol, The	9:285
Training Courses at Fulmer Grange	1:35
Training is line management responsibility	11:354
Training of concrete workers, The	10:331
Trends in highway bridges	9:316
Trough and waffle floors	12:392
Unique pile test at YMCA site	12:391
Visit to new laboratories	1:28
Weathering of concrete, The	2:53
Weathering of Concrete Symposium	3:95
Wide-ranging courses for the concrete industry	8:265
Workability and flow behaviour (of concrete)	12:373
World utilization of prestressed precast concrete piles, The	1:5

Cladding. The provision of compression joints in the cladding of reinforced concrete building. A4, 4 pages. 1970. Data Sheet
- 53.001 15p
Please be Practical! Detailing for easier construction-reinforcement. A4b (landscape), 24 pages, illustrated. 1970. Cartoon booklet. SBN 7210 0727 9
- 53.002 £1-00
The Concrete Society Directory 1969. A4, 159 pages. 1969. SBN 7210 0626 4
- 53.019 £3-50 (53.003-18)
United Kingdom technical contributions presented at the Sixth International Congress of the Federation Internationale de la Precontrainte, Prague 1970. A4, illustrated. The complete set of the undermentioned 16 papers (not obtainable separately). SBN 7210 0751 1
- The durability of prestressed concrete with reference to a structure under demolition by D. A. Andrews
- Cracking in partially prestressed members by A. W. Beeby and H. P. J. Taylor
- The application of standard prestressing double-T units in conjunction with precast H-frames by J. S. Bernatek
- Developments in systems for prestressing large nuclear pressure vessels by R. E. D. Burrow and J. D. Brunton
- The prestressing of Sydney opera house roof by D. J. Dowrick
- The use of prestressing in foundation strengthening at York Minster by D. J. Dowrick
- New developments in the Freyssinet system by J. T. C. Harvey
- H-block precast concrete units for bridge abutment, wing wall and pier construction by W. Henderson

The prestressed lightweight concrete roof for Doncaster racecourse grandstand by T. Maciag

The design of end zone reinforcement for pre-tensioned prestressed concrete beams by W. T. Marshall and D. Krishnamurthy

The design of the prestressed suspended frame for the Standard Bank Centre, Johannesburg by Duncan Michael

Quality control of mass produced prestressed concrete components—statistical methods applied to tests on the actual product and fresh concrete by R. A. D. Noble

The application of prestressing to improve the stability of precast concrete structures by A. S. Safier

Stresses due to prestressing cables in curved ducts by Professor F. Sawko and S. Chatterjee

The construction of a railway bridge using pipe jacking techniques by J. C. Thomson

A continuous extrusion process for prestressed concrete by B. J. Wass and E. W. Bennett

Proceedings of Conferences and Symposia

- 23.001 £1-00
The design of prestressed concrete bridge structures. Proceedings of a one-day meeting held at Church House, Westminster, 6 June 1967 and organised by the Prestressed Concrete Committee of The Concrete Society. A4, 94 pages. SBN 7210 0003 7
- 23.002 £5-00
Proceedings of the First International Congress on Lightweight Concrete, London, May 1968. Volume 1: Papers. A4, 323 pages, illustrated. 1968. SBN 7210 0001 0
- 23.006 £5-00
Volume 2: Discussion. A4, 230 pages, illustrated. Hard covers. 1970. SBN 7210 0002 9. (Note: The combined price for the two publications 23.002 and 23.006 is £8-00.)
- 23.003 £3-00
Design for movement in buildings. Proceedings of a one-day Symposium held in London on 14 October 1969. A4, 130 pages. Illustrated ring binder. 1969. SBN 7210 0709 0
- 23.004 £3-00
The science of admixtures. Proceedings of a Symposium organized jointly by The Concrete Society and the Cement Admixtures Association and held in London 6 November 1969. A4, 70 pages. Illustrated. 1969. SBN 7210 0712 0
- 23.005 £2-00
Drawing and detailing by automated procedures. Papers presented at a Symposium, Birmingham, 13 April 1970. A4, 90 pages. Illustrated. 1971. SBN 7210 0748 1
- 23.007 £2-00
The weathering of concrete. Proceedings of a one-day Symposium at the Royal Institute of British Architects, organized by the Design and Development Divisional Committee of The Concrete Society. A4, 48 pages. Illustrated. 1970. SBN 7210 0768 6
- Absorption aggregates, 51.061
- Aggregates (see also specific types), 51.036, 51.059, 51.061
- Architectural concrete (see Finishes)
- Autoclaving, 52.013
- Beams, 52.001, 52.002, 52.014, 53.019
double-T, 52.001, 53.019
- Bentonite, 51.024, 51.026, 51.027
- Blocks, concrete, 51.037, 51.059
- Bridges, 23.001, 53.019
- Cables, prestressing, 53.016
- Cast stone (see Precast Concrete)
- Cladding, 52.019
- Concrete products (see Precast concrete)
- Construction, 51.041, 51.044
- Cracking, 53.019
- Design, 51.002, 53.019
- Detailing, 23.005, 53.001
- Directories, 53.002
- Durability
of structures, 53.019
of concrete, 23.007
- Elevated structures, 51.012
- Exposed aggregate, 51.059
- Extrusion, 53.019
- Facing slabs (see Finishes)
- Falsework, 51.032, 51.033, 51.034, 51.035, 51.049
- Finishes, 51.040
- Flyovers, 51.012
- Footbridges (see Bridges)
- Formwork, 51.032, 51.033, 51.034, 51.035, 51.049, 52.008
- Foundations, 51.026, 52.009, 53.019
- Frames, 53.005, 53.013
- Freyssinet system, 53.009
- Grandstands, 51.060, 53.011
- Grouting, 52.016
- Inverted T-beams, 52.014
- Jacking pipes, 53.017
- Joints, 52.019
- Lightweight concrete, 23.002, 23.006, 51.036
roofs, 53.011
- Maintenance, road, 51.017
- Moisture movement, 51.054, 51.061
- Mortar, 51.048
- Motorways, 51.017
- Movement, 23.003
- Nuclear pressure vessels, 53.006
- Piles, 51.024, 52.009
- Pipes, 53.017
- Precast concrete, 51.055, 51.056, 51.057, 53.019
- Pressure vessels, 51.013, 51.015, 53.019
- Prestressed concrete, 52.009, 53.019
- Prestressing, 52.010, 52.016, 53.008, 53.009, 53.015, 53.016
- Quality control, 53.014
- Reinforced concrete, 52.013
- Reinforcement, 53.012
- Roads, 51.012, 51.016, 51.017, 51.038
- Roofs, 53.007, 53.011
- Safety, 52.010
- Specifications, 51.048
- Steel (see Reinforcement)
- Subways (see Bridges)
- Surface finishes (see Finishes)
- T-beams, 52.001, 52.014
- Tendons (see Reinforcement)
- Testing, 51.031
- Town planning, 51.039, 51.044, 51.045
- Urban highways (see Roads)
- Water gain, 51.054
- Weathering, 23.007
